Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A medical device comprising:

A biocompatible, an implantable structure;

a basecoat matrix, including a combination of rapamycin and 2methoxyestradiol, in therapeutic dosages, incorporated in a first polymeric material, the basecoat matrix being affixed to the surface of the implantable medical device; and

a topcoat, including a second polymeric material, affixed to the basecoat matrix for controlling the elution rate of the rapamycin and the 2-methoxyestradiol.

- 2. (Original) The medical device according to claim 1, wherein the implantable structure comprises a stent.
- 3. (Original) The medical device according to claim 1, wherein the implantable structure comprises a stent-graft.
- 4. (Original) The medical device according to claim 1, wherein the implantable structure comprises an anastomosis device.
- 5. (Original) The medical device according to claim 1, wherein the second polymeric material is incompatible with the first polymeric material, thereby creating both a physical and chemical barrier to the elution of the rapamycin and the 2-methoxyestradiol.
- 6. (Original) The medical device according to claim 5, wherein the first polymeric material comprises a fluoropolymer.

- 7. (Original) The medical device according to claim 6, wherein the second polymeric material comprises an acrylic.
- 8. (Currently Amended) A medical device comprising: an <u>a biocompatible</u>, implantable structure; and a combination of rapamycin and 2-methoxyestradiol, in therapeutic dosages, releasably affixed to the implantable structure for the treatment of restenosis following vascular injury.
- 9. (Original) The medical device according to claim 8, wherein the implantable structure comprises a stent.
- 10. (Original) The medical device according to claim 8, wherein the implantable structure comprises a stent-graft.
- 11. (Original) The medical device according to claim 8, wherein the implantable structure comprises an anastomosis device.
- 12. (Original) The medical device according to claim 8, further comprising a polymeric coating, the combination of rapamycin and 2-methoxyestradiol being incorporated into the polymeric coating.
- 13. (Withdrawn) A method for treating restenosis comprising the local administration of a therapeutic dose of a combination of rapamycin and 2-methoxyestradiol.
- 14. (Withdrawn) A method for treating restenosis comprising the administration of a therapeutic dose of a combination of rapamycin and 2-methoxyestradiol.
